Map of Distribution of Rosenwald Buildings by County

INTRODUCTION

The Oklahoma State Historic Preservation Office undertook the development of an historic context for the Julius Rosenwald Fund in Oklahoma in 1996. The context was one of the objectives identified by the office to meet the overall goal of identifying and evaluating historic and prehistoric resources significant in Oklahoma's past. The Rosenwald Fund is significant for its association with the development of African-American education in Oklahoma and local efforts to better facilities for African-American schoolchildren during the first half of the twentieth century.

The Julius Rosenwald Fund was created in 1917 by Julius Rosenwald, president of Sears, Roebuck and Company and philanthropist for a variety of causes.

Rosenwald, beginning in 1913, provided limited funding for the construction of African-American schools in Alabama. Due to the success of this endeavor and persistent need in Alabama and other southern states, the "Julius Rosenwald Fund" was incorporated under the state laws of Illinois on October 30, 1917. The fund was active throughout the southern United States, including the states of Oklahoma, Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia.

During the first part of the program, the primary purpose of the Rosenwald Fund was the construction of new school buildings to create a better educational environment for African-American schoolchildren. Total in Oklahoma, 198 education-related buildings were constructed with aid from the Rosenwald Fund. This consisted of 176 schoolhouses, 16 teachers' homes and 6 shops. The Rosenwald school building program ended in Oklahoma and nationally in 1932.

The Rosenwald fund was active in forty-four of Oklahoma's seventy-seven counties. Under Oklahoma's comprehensive preservation planning process, the state has been split into seven management regions (Map 1). The majority of Rosenwald activity was centered in Regions 3, 4, 5 and 6. Of these four regions, Region 3 had the least number of counties receiving aid from the Rosenwald Fund. Of the nineteen counties in Region 3, eight counties, Pawnee, Washington, Craig, Ottawa, Mayes, Delaware, Cherokee and Adair, did not have any Rosenwald buildings. However, Region 3 contains several of the counties having the highest number of Rosenwald buildings, such as Wagoner County with twenty buildings and Okfuskee County with seventeen Rosenwald buildings. Every county in Region 4 except for Haskell County received aid from the Rosenwald Fund. Similarly in Region 6, only Canadian County had no Rosenwald buildings. In Region 5, eight of the ten counties participated in the Rosenwald school building program. Neither Pontotoc or Marshall counties in Region 5 had Rosenwald buildings.

Counties in both Management Region 2 and 7 also received aid from the Rosenwald Fund, although on a more limited scale than Regions 3, 4, 5 and 6. In Region 2, only Kay and Noble counties constructed buildings using Rosenwald monies. Even then, each county received aid for only one building. Rosenwald activity was more prevalent in Region 7. Of the total seventeen counties in Region 7, eight counties utilized funds from the Rosenwald school building program. However, the overall number of buildings per county in Region 7 is low. Blaine and Caddo counties with four buildings each constructed the most Rosenwald buildings in Region 7. There were no Rosenwald buildings constructed in Region 1.

In addition to the construction of school buildings, the Rosenwald Fund contributed money for black school libraries, transportation to separate consolidated schools, African-American teacher education and black colleges and universities. The fund also had programs related to health and medicine, race relationships and miscellaneous other activities related to the well-being of mankind. The Julius Rosenwald Fund continued in operation until 1948 when, as intended by Julius Rosenwald, all monies had been spent and the trustees dissolved the fund.

Preparation of the historic context is the first step in the identification and evaluation of Rosenwald buildings in Oklahoma. Because the location of the buildings was not recorded in the Rosenwald Fund Building Files, obtained from the Julius Rosenwald Fund Archives at Fisk University, SHPO staff has initiated efforts to identify and document the location of the Rosenwald buildings. To do this, contact with the county clerks in the forty-four counties containing Rosenwald buildings has been made. Using the school district records, it is anticipated that the approximate location of the properties can be determined.

Once the location has been determined, this will then allow for minimum level documentation of those properties which are still extant. Minimum level documentation consists of completion of the Historic Preservation Resource Identification Form and a minimum of two elevation photographs. Following their identification and documentation, the buildings will be evaluated for potential National Register eligibility. The ultimate goal of this project is to nominate those extant properties which meet the eligibility requirements to the National Register of Historic Places.

Currently, there is one Rosenwald building in Oklahoma already listed on the National Register of Historic Places. The Rosenwald Hall in Lima, Seminole County, was listed on the National Register on September 28, 1984. The building was nominated as a part of the thematic nomination entitled "Educational Resources of All-Black Towns in Oklahoma." In the Rosenwald Building Files, Rosenwald Hall was identified as Lima School, District #5.

Research for the historic context for the Julius Rosenwald Fund in Oklahoma was initiated by Susan Allen Kline, former Architectural Historian of the Oklahoma SHPO. Further research and development of the historic context was completed by Cynthia Savage, staff Architectural Historian. All personnel meet the Secretary of the Interior's qualifications.

Acknowledgment is extended to Beth Howell of Fisk University for her assistance in obtaining copies of the Rosenwald Fund Building Files. This information was invaluable in preparing the historic context.

HISTORIC CONTEXT

During the first half of the twentieth century, the educational opportunities for African-American schoolchildren were stifled by racism, a shortage of money and inadequate facilities. Beginning in the mid-teens, however, black schools throughout the south received much needed financial assistance from the Julius Rosenwald Fund. Created by Julius Rosenwald, the Rosenwald Fund's initial activity was to aid in the construction of new buildings for black schools. Although the fund did not provide all the money necessary for the construction of new buildings, it did provide sufficient money to act as an impetus for the local district to better their facilities. In Oklahoma, the Rosenwald Fund aided in the construction of 198 education-related buildings in 44 counties between 1920 and 1932. Of the 198 buildings, 176 were schoolhouses, ranging in size from 1-teacher to 22-teacher; 16 were teacherages; and, 6 were shops. In addition, the fund also partially financed additions to buildings which had originally been built using Rosenwald funds and even aided in the rebuilding of a Rosenwald school which was destroyed by fire.

Separate schools for black children were constitutional under the 1896 United States Supreme Court decision in *Plessy v. Ferguson*. This landmark case justified the creation of separate schools using the doctrine of "separate but equal." This doctrine allowed schools under the United States Constitution to be separated on the basis of race as long as the treatment of the races were equal.

In Oklahoma Territory, the 1897 territorial legislature mandated racial separation of schools, juries and public facilities. This policy of segregation continued into statehood when the 1907 state legislature, as one of its first undertakings, enacted a

“Jim Crow” law restricting use of not only school and public facilities but also transportation. Section III, Article XIII of the Oklahoma Constitution provided for “a complete plan of separation between the white and colored races, with impartial facilities for both races.” As defined by the statute, the term “white” included all non-black races.¹

In Oklahoma, the school system was designed so that members of the majority race in the school district, either African-American or white, composed the school board, which had authority over the local school district. The county then maintained a separate school for the minority students or made arrangements for their transfer to a compatible racially composed school in another district. The majority school was supported by a tax levied on all property in the district. The minority school was maintained by a tax levied on all property in the county, not to exceed one mill.²

The preponderance of separate schools in Oklahoma by 1917 were for black students. At the time, there were over 30,000 black students enrolled in rural schools in Oklahoma. Most of these schools were maintained by county-wide taxation. Because many counties were unable to levy sufficient funds to adequately maintain the separate schools, the legislature increased the amount of levy from one mill to two mills in 1921. At that time, enrollment of black students exceeded 36,000.³

By 1923, the number of African-American students had risen to 42,274, comprising ninety-eight percent of the enrollment in separate schools. Within two years, the number of black students enrolled in an Oklahoma school increased by over 5000, bringing the total to 47,452. The number of enrolled black students continued to moderately grow so that by the school year ending 1930, over 49,000 African-

American schoolchildren were registered in Oklahoma's schools. In 1932, 50,623 black students attended school in nearly 600 separate schools. Although the number of students remained fairly constant through 1934, due to consolidation and other factors the number of separate black schools fell to 576.⁴

Even after the mill levy increase in 1921, inadequate facilities continued to plague many of the separate schools. In 1928, the State Board of Education characterized many of the separate schoolhouses as "unfit for human occupancy." Lacking basic amenities such as desks and stoves, the separate schools also were unable to attract quality instructors. Additionally, because a levy of two mills was insufficient to maintain the schools, money was often obtained by reducing the salaries of teachers or the length of the school term for separate schools. All of which combined did not provide a sufficient, quality education for the African-American students.⁵

Following the turn-of-the-century, various attempts to better the quality of education for African-American children were made by a number of northern philanthropists. One of these efforts was a grant program for the construction of new school buildings for black children funded by H. H. Rogers of the Standard Oil Company. Beginning in 1905, Rogers and his family donated money to Tuskegee Institute, founded by Booker T. Washington, for an extension program. The money was primarily used to build black schools in Macon County, Alabama. The Rogers grants provided only matching funds and relied on the support of the local black community. Forty-two schools were built in Macon County using the Rogers grants, as well as schools in five other Alabama counties. The Rogers grants were discontinued in 1909, however, with the death of H. H. Rogers.⁶

In 1912, Booker T. Washington presented a similar program to Julius Rosenwald, president of Sears, Roebuck and Company and newly elected trustee of Tuskegee Institute. Washington proposed a school building program similar to the Rogers grants but which called for expansion to other states and the cooperation of the local white community. The program would be headed by a general agent who worked closely with county officials. The county officials would have the responsibility for raising the local aid. The following year, on his fiftieth birthday, Julius Rosenwald gave \$25,000 to Washington for this program. The money was distributed by the Extension Department of Tuskegee Institute. In 1914, Rosenwald extended the "Rosenwald program" by making \$300 available per school for the construction of 100 additional school buildings.⁷

Rosenwald continued his contributions through 1917, when it became obvious that a more permanent organization was needed. On October 30, 1917, the Julius Rosenwald Fund was incorporated as a non-profit organization under the laws of the state of Illinois. Rosenwald provided the initial endowment and continued to contribute large sums until his death in 1932. The majority of his contributions were in the form of shares of capital stock for Sears, Roebuck and Co. The fund was established to receive and dispense funds for philanthropic causes related to the "well-being of mankind."⁸

The primary focus of the Rosenwald Fund between 1917 and 1932 was the construction of new school buildings for African-American schoolchildren. The school building program accounted for all but \$600,000 of the first \$4 million spent by the Rosenwald Fund. The fund constructed education-related buildings in a total of fifteen

states. Besides Oklahoma these included Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. The Rosenwald Fund formally ended its school building program in 1932. Although it was recognized that the need for adequate school buildings for African-American schoolchildren still existed, the program was terminated because of the belief that the southern states would come to rely too heavily on outside aid for black schools and would therefore not develop adequate infrastructure to deal with the situation. In 1937, at the request of President Franklin D. Roosevelt, one last Rosenwald school was constructed in Warm Springs, Georgia.⁹

When initially organized, a board of trustees, consisting of Rosenwald and three members of his immediate family, oversaw the Rosenwald Fund. In 1928, the fund's administrative unit was drastically re-organized. Edwin Embree, the former director and vice president of the Rockefeller Foundation, became the president of the Rosenwald Fund. A full-time staff was hired to handle the fund's programs and the board of trustees was expanded from three members to ten and, subsequently, fifteen.¹⁰

An important provision Rosenwald made in the 1928 re-organization was that the fund was not to be an enduring foundation. Believing that "perpetual endowments could easily become a hindrance to progress,"¹¹ Rosenwald stipulated that the trustees deplete the fund within twenty-five years of his death. In addition, at the discretion of the trustees, the endowment could be spent at any time. The Rosenwald Fund continued in operation until 1948 when all monies had been spent and the trustees dissolved the fund.¹²

Following the fund's incorporation in 1917, Tuskegee Institute continued to manage the program until 1920. At that time, an independent central office, the Julius Rosenwald Fund Southern Office, was created in Nashville, Tennessee, under the direction of Samuel L. Smith, former Tennessee State Negro School Agent. The association with Tuskegee Institute was terminated in part because the activities of the fund became too comprehensive for the institute, as well as criticisms concerning the institute's supervision of the construction activity and financial practices. Another contributing factor to the dissolution of the relationship with Tuskegee Institute was that some white state and county officials were hesitant to participate in a program administered by African-Americans.¹³

After the centralization of the fund's school building program in Nashville, the Southern Office issued guidelines for the expanded Rural School Building Program. These guidelines mandated that each state school superintendent and Negro School Agent prepare a tentative annual budget for rural black school construction. After approval by the Southern Office, the Rosenwald Fund allocated the amount to be transferred to the state after each school's completion to a minimum standard and an on-site inspection. The size of the grant for each school was based on the number of teachers employed. Generally, for a one-teacher building, the grant was \$500 which ranged to a maximum of \$2,100 for a ten-teacher school.¹⁴

The Rosenwald Fund mandated minimum standards for the buildings constructed using their grants. The schools were to follow the standardized designs available from the Rosenwald Fund or the director of the Southern Office had to approve the plans. Published and revised by the fund between the years of 1921-1931,

Community School Plans included plans for buildings ranging in size from one-room to twelve-rooms. Because of lack of use, odd-numbered plans above six-teacher were eventually discontinued; as such, there were no seven-room or nine-room Rosenwald schools originally constructed in Oklahoma. The plans for the teachers' homes and vocational shops were also furnished by the Rosenwald Fund.¹⁵

All plans were for one-story buildings and two plans were developed for each teacher-type. The plan utilized depended on the orientation of the school building; one plan was for an east or west facing building, the other for a north or south facing building. Anticipating a lack electricity in most situations, both plans were designed so that all classrooms received east or west light only. The desire for east-west light only was based on the work of Fletcher B. Dresslar, a significant American theoretician at the time on school buildings and a favorite former professor of Samuel L. Smith, director of the Rosenwald Fund's Southern Office. East-west sunshine was believed to maximize the natural light while also being the most conducive for a learning environment.¹⁶

The plans were designed to allow for later expansion with one-, two-, or three-room additions. Additionally, each school was required to have two sanitary toilets or privies which met each state's Department of Health requirements. Teachers' homes were also to be provided with "ample toilet facilities." If conditions allowed, the Rosenwald Fund encouraged construction of an inside toilet but they also provided plans for outside privies. Generally, it was believed that one seat for every twenty to twenty-five students was sufficient.¹⁷

The Rosenwald Fund furnished the plans to the State Departments of Education, without cost, in all southern states for use in both colored and white schools.

Numerous white schools throughout the south utilized the Rosenwald plans when constructing new buildings. This service was maintained after the discontinuation of the Rosenwald Rural School Building Program in 1932.¹⁸

On the local level to receive a Rosenwald building, the benefiting district had to be a rural district with a school term of at least five consecutive months. In order to qualify for a teachers' home, the school term had to be eight months or more. In addition, the community had to guarantee enough land for playgrounds and agricultural work, a mainstay in early twentieth century education.¹⁹

The Rosenwald Fund encouraged the employment of an African-American at the state-level to oversee black schools and, specifically, the Rosenwald activities within the state. Commonly called a "Rosenwald Agent," half of the agent's salary was supplied by the Rosenwald Fund and the other half by the state government in the early years of the program. The Rosenwald Agent's responsibilities included overseeing the Rosenwald-related fundraising activities and promoting industrial education.²⁰

Utilizing the techniques of a "high-pressure salesman," the Rosenwald Agent presented the need for improved facilities to local school officials and citizens, white and black. Using the Rosenwald Fund as an inducement, the agent then encouraged a variety of fundraising activities to raise sufficient match to allow for the construction of a new school building. In addition to cash, the Rosenwald Fund allowed labor, materials and land to count as match at the community level.²¹

Beginning in 1920-1921, Oklahoma's separate schools started receiving funds from the Julius Rosenwald Fund for the construction of "sanitary, modern and substantial" schools. In addition, the fund provided blueprints and specifications for many small school buildings in the state, white and separate. The first Rosenwald building in Oklahoma was the three-teacher type Vernon School in McIntosh County. This was also the first application for a Rosenwald building approved by Samuel L. Smith, newly appointed director of the newly created Julius Rosenwald Fund Southern Office.²²

During the first two years of the program, twenty-two school buildings were built in fifteen counties. The third year, the fund granted \$13,100 in assistance for the construction of twenty-one school buildings in ten counties. The following year, sixteen schools were built in eight counties, costing the Rosenwald Fund \$10,150. In 1924, twenty-one Rosenwald buildings were erected in thirteen counties. The Rosenwald Fund's building program peaked in Oklahoma in 1925 with twenty-six buildings in fourteen counties being constructed. By 1925, over one hundred schools had been built using the Rosenwald Fund. Total, the buildings built between 1920 and 1925 cost \$400,000, of which the Rosenwald Fund contributed \$73,680, the local black community \$20,000 with the remainder coming from the counties and school districts.²³

After 1925, the fund continued to aid schools at a fairly constant rate. During the years of 1926 and 1927, the fund provided money to twenty-three and twenty-two schools respectively each year. Seventeen counties in 1926 received Rosenwald buildings and sixteen in 1927. In 1928, seventeen districts in thirteen counties benefited from new buildings. The last year of significant use of the Rosenwald Fund

in Oklahoma occurred in 1929 with twenty buildings in ten counties being constructed. The next year, only five new buildings in four counties were erected under the fund.²⁴

In addition to the building program, beginning in 1928, the Rosenwald Fund started providing funds to develop libraries in the separate schools and, for the 1929-1930 school year, began providing aid for transportation of black students to consolidated and town schools. Similar to the school building program, the Rosenwald library program provided one-third of the cost of buying the books, with the local community and the public school fund picking up the other two-thirds. The fund also paid the shipping charges to get the books to the local school. For the first year of the library program, eight schools in seven Oklahoma counties benefited from this aid with a total expenditure of \$320, of which each school received \$40. Between 1930 and 1932, the fund assisted twenty-seven schools in building thirty-four library collections. Many districts received aid for both their elementary and high school libraries. With the average contribution of \$40, the Rosenwald Fund expended \$1,888.86 in Oklahoma for this program between 1930-1932. The library aid continued through 1934, with ten libraries being developed in eight counties. At a total cost of \$1140 for the 1932-34 period, two Oklahoma elementary and eight high school libraries were developed in nine districts.²⁵

The Rosenwald transportation program was funded on a sliding scale over a period of three years. The first year, the amount given by the Rosenwald Fund was not to exceed half of the cost of maintaining the transportation system with a maximum cap of \$500 per route. The following year, the fund provided one-third of the cost, not to exceed \$300. For the third year, the Rosenwald Fund donated one-fourth of the cost.

For the school year beginning 1929, of the total investment of \$6,524 spent primarily on purchasing buses to transport students to six schools in Kingfisher and Pittsburg counties, the Rosenwald Fund contributed \$2,638. By the end of this program with the 1931-1932 school year, twenty-seven schools in twenty-one counties received aid from the Rosenwald Fund in the amount of \$8,913.49. Nearly 2,300 students benefited from the improved transportation system.²⁶

Through 1930, the Rosenwald Fund facilitated the construction of 173 school houses, 16 teachers' homes and 4 shops for teaching industries. Total, the construction of these schools up to July 1, 1930 cost \$961,173. Of this, the Rosenwald Fund spent \$124,655, African-Americans \$28,175, whites \$3,825 and the remaining balance of \$804,518 was expended by the public school funds of the benefiting counties and school districts.²⁷

In 1932, the Rosenwald sponsored school building program ended. Only four buildings in four counties were built after 1930. The date of construction for one school is unknown, bringing the total number of Rosenwald buildings in Oklahoma to 198. Total investment equaled \$1,127,449 with the Rosenwald Fund giving \$145,055, the school districts \$948,054, the local black communities \$28,865 and the white community \$5,475. Located in 44 of Oklahoma's 77 counties, the Rosenwald schools had a pupil capacity of 19,575 and teacher capacity of 435. This provided sufficient accommodation for more than one-fourth of the employed black teachers and one-third of the black students enumerated in Oklahoma.²⁸

In Oklahoma, the Rosenwald Fund contributions ranged from \$200 for a one-teacher type school to \$5,300 for the 22-teacher Washington Separate Consolidated #3

School built in 1931 in Oklahoma County. The average Rosenwald grant was between \$400 and \$900 per building. The total cost of the buildings in Oklahoma ranged from a low of \$1,000 for the one-teacher, 1924 Clow's Chapel School in Choctaw County to the \$63,338 for again Oklahoma County's Washington Separate Consolidated #3. Generally, the brick schools were larger than one-teacher, received larger grants from the Rosenwald Fund and cost more to construct.²⁹

The black community in Oklahoma contributed money for the construction of about 121 buildings. These contributions ranged from \$30 for the 1923, two-teacher Porter School in Wagoner County to \$1,600 for Oklahoma's first Rosenwald school, Vernon School in McIntosh County, a three-teacher school built in 1920. Only nine buildings received monies from the local white communities. This assistance ranged from the \$50 for the 1931 shop at Kingfisher County's Dunbar Consolidated School to \$1,600 for Comanche County's eight-teacher Douglass School built in 1930.³⁰

In comparison to the fourteen other states which received money from the Rosenwald Fund, Oklahoma ranked eleventh in terms of number of school buildings and amount of aid from the Rosenwald Fund. In terms of total cost of the buildings, Oklahoma came in twelfth of the fifteen states. Alabama ranked eleventh with a total cost of nearly \$1.3 million. In both the amount contributed by African-Americans and that by whites, Oklahoma ranked fourteenth.³¹

As previously mentioned, the plans for the Rosenwald buildings were designed to easily accommodate additions. Seventeen schools in Oklahoma partially funded additions to their Rosenwald building with another Rosenwald grant. The additions

occurred as rapidly as the year after original construction. Several of the districts also added more than one addition.

Rosenwald schools with additions included the 1925 Douglas School in Geary District #80 which expanded from a two-teacher type school to a four-teacher type in 1930. Caddo County's Binger Separate School went from a 1927 two-teacher type to a three-teacher in 1930. Two schools in Creek County expanded with one being added on to twice. The Harlingsville School #43 was originally constructed using Rosenwald funds in 1924 as a three-teacher type and in 1926 the school expanded to a five-teacher type. The Lowarance Industrial School in Creek County was originally constructed in 1923 as a three-teacher type. Four years later one room was added to make a four-teacher school and the following year additional construction resulted in a six-teacher type school.

In Jackson County, the Lincoln High School for Separate District #18 expanded from its 1926 four-teacher type building to a seven-teacher type in 1930. The 1921 Lacey Separate School in Kingfisher County went from a four-teacher school to a six-teacher school in 1927. The Dunbar Consolidated School #1 at Wellston also increased to a six-teacher school in 1926 from its original 1921 three-type. McCurtain County's Oak Grove School doubled its 1922 size in 1925 when it became a two-teacher type school and expanded again in 1928 with an additional room being constructed.

Also in McCurtain County, the Slater Rosenwald County Training School went from a five-teacher building to a six-teacher school in 1925, one year after its original construction. The Separate Consolidated School #1 in McIntosh County was built in 1924 as a three-teacher building and in 1928 a one-room addition increased it to a four-

teacher school. The 1920 three-teacher type Vernon School in McIntosh County, the first Rosenwald school in Oklahoma, expanded in 1925 when it became a four-teacher school. In Payne County, the Fraiser School, Separate District #60 went from its 1925 two-teacher type to a three-teacher type in 1930. Snake Creek School, District #69 in Tulsa County was a two-teacher type in 1924, became a three-teacher type two years later and expanded again to a four-teacher type in 1927.³²

Due to the prevalent use of weatherboard for construction material, fire posed an especial risk to the Rosenwald buildings. Fires, in fact, destroyed at least three Rosenwald schools in Oklahoma. The Nobletown School District #19, built originally in 1925, was reconstructed with aid from the Rosenwald Fund in 1929 following a fire of unknown causes. The school remained a three-teacher type as originally constructed. The two-teacher type Timber Hill School in Bryan and Choctaw counties was constructed in 1925 and burned in August of the following year. The 1923 Harrison Chapel School in Wagoner County suffered a similar fate on approximately December 10, 1926. Neither of these schools were reconstructed using Rosenwald grants. Other types of disasters also destroyed Rosenwald buildings. For example, the 1922 Rock Hill School and Teacherage, also in Wagoner County, were destroyed by a tornado on October 13, 1927.³³

Of Oklahoma's seventy-seven counties, the Rosenwald fund was not active in thirty-three counties. There were no Rosenwald buildings constructed in the northwest part of Oklahoma, including the counties of Cimarron, Texas, Beaver, Harper, Woods, Alfalfa, Grant, Garfield, Major, Woodward, Ellis and Dewey. The Rosenwald fund also did not aid schools in far western Oklahoma, including Roger Mills, Beckham,

Washita and Harmon counties. The Rosenwald fund made no grants in the extreme northeast part of the state in Ottawa, Craig, Delaware, Mayes, Cherokee or Adair counties. Additionally, no Rosenwald buildings were constructed in a strip of Oklahoma counties in the south central part of the state, including the counties of Canadian, Grady, Stephens, Cotton and Jefferson. Scattered among the forty-four counties that had Rosenwald buildings, the counties of Murray, Marshall, Pontotoc, Pawnee, Washington and Haskell also did not participate in the Rosenwald school building program.

Among the forty-four counties with Rosenwald buildings, McCurtain County in far southeastern Oklahoma enjoyed the majority of activity with twenty-one Rosenwald buildings (Map 2). Wagoner County in the northeastern quadrant of the state followed closely behind with twenty buildings. Other counties with a significant number of Rosenwald buildings include Okfuskee with seventeen; Creek and Seminole with fifteen Rosenwald buildings each; and, Carter with eleven buildings.

Choctaw County had the next highest number of Rosenwald buildings with eight. After Choctaw County were McIntosh and Oklahoma counties with seven buildings each. Three counties received aid for five new schools each, Sequoyah, Tulsa and Logan counties. Several counties applied for and received aid for four Rosenwald buildings, including Pottawatomie, Garvin, Blaine and Caddo counties.

More numerous in Oklahoma were those counties with three or less Rosenwald buildings. Counties with three Rosenwald funded buildings included LeFlore, Pittsburg, Kingfisher, Comanche, Tillman and Jackson. Six counties received two new buildings each, including Pushmataha, Muskogee, Bryan, Johnston, McClain and

Payne counties. Those counties with only one Rosenwald building included Nowata, Rogers, Osage, Okmulgee, Latimer, Atoka, Coal, Love, Hughes, Lincoln, Cleveland, Noble, Kay, Custer, Kiowa and Greer.³⁴

In terms of population, Wagoner County boasted the largest county percentage of African-American population in the state in the 1930 census. Although the number of blacks in Wagoner County only equaled 6,753, they comprised 30.1 percent of Wagoner County's total population. McCurtain County had a larger number of black residents with 7,795 and one more Rosenwald building but African-Americans composed only 22.4 percent of the overall county population. In Okfuskee County with 17 Rosenwald buildings, 25.1 percent of the county was African-American with a population of 7,283. African-Americans in Creek and Seminole counties comprised significantly less of the overall county percentage. In Creek County, with a population of 6,584, blacks only equaled 10.3 percent of the county's population. Similarly in Seminole County, with a population of 5,607, African-Americans comprised only 7 percent of the county population.

Ranking seventh in the number of Rosenwald buildings, Carter County had a relatively low number of African-American citizens, 3,696, which equaled 8.9 percent of the county population. With 4,994 blacks and eight Rosenwald buildings, Choctaw County had almost 1300 more black residents than Carter County and they equaled nearly 21 percent of the county's population. Comparably, McIntosh County with seven Rosenwald buildings boasted a black population of 4,448, equaling almost 18 percent of the cumulative county population.

Also receiving aid for seven Rosenwald buildings, Oklahoma County had the second highest number of black residents, 17,524, in the state but they composed only 7.9 percent of the county population. Tulsa County, containing five Rosenwald buildings and the state's other major metropolitan area, had the state's highest number of African-American inhabitants with 17,817 but, again, this comprised only 9.5 percent of the county population. Although having a considerably lower black population with only 1,596 citizens, Sequoyah County had a comparable overall percentage of African-Americans with 8.2 percent. The third county with five Rosenwald buildings, Logan County, on the other hand, had a fair sized black population with 6,487 which equaled 23.4 percent of the county population.

Among the four counties with only four Rosenwald buildings, only in Blaine County did African-Americans equal over 10 percent of the county population. Blacks in Pottawatomie, Garvin and Caddo counties comprised under 5 percent of the county population. In all four counties, the actual black population was comparable in size with Garvin County at 1,443 being the lowest and Blaine with 2,130 black residents the highest.

The six counties with three Rosenwald buildings also had a fairly similar number of African-American residents. The number of black residents in these counties ranged from only 1,458 in Comanche County to a high of 3,770 in Pittsburg County. However, these counties boasted a slightly higher percentage of blacks in the county than those with four Rosenwald buildings. Only two counties, LeFlore and Comanche, had a black population below 5 percent of the overall county population. Jackson and Pittsburg counties were nearly equal with 6.9 percent and 7.4 percent of

the respective county populations being African-American. Kingfisher and Tillman were also nearly equal in terms of the percentage of blacks in the county with the former having 12.1 percent and the latter 12.3 percent.

Except for Muskogee County, those counties with only two Rosenwald buildings had a fairly small percentage of blacks. In four of these counties, Pushmataha, Bryan, Johnston and McClain, the percentage of blacks in the county was below four percent. Of these four counties, only Bryan County had an actual black population of over 1,000. With 1,924 African-American residents equaling 5.2 percent of the county's population, Payne County had a slightly higher percentage and actual black population than the other four counties. Muskogee County was clearly the exception in this group. Having the third largest black population in the state with 16,059, over 24 percent of the county's population was black.

Only two of the sixteen remaining counties with a Rosenwald building had a black population composing more than ten percent of the county's population. In Nowata County, with a population of 1,542 black residents, 11.3 percent of the county was African-American. Ranking fourth in terms of black population in the state with 11,014, Okmulgee County's African-Americans composed 19.5 percent of the county population. The black population in the other counties with only one Rosenwald building ranged in size from Latimore County's 385 to Lincoln County's 3,272. In all of these counties, the percentage of blacks in the county comprised less than 10 percent of the overall population.³⁵

Eight of the above counties with Rosenwald buildings had at least one all-black town. Prior to statehood in 1907, Oklahoma boasted twenty-eight all-black

communities and one colony. The majority of these, twenty-four, were located in Indian Territory and only four towns and the colony in Oklahoma Territory. After 1907, many of these towns began to decline; however, nineteen of the original twenty-eight remained in existence through World War II.³⁶

Of the identified all-black towns, at least eleven received a grant from the Rosenwald Fund. This included the Wellston Colony in Lincoln County which constructed the Dunbar Consolidated School #1 in 1921 and the all-black town of Tatums in Carter County which constructed a new school for the Tatums School District #50 in 1925. Both the all-black towns of Boley and Booker-Tee in Okfuskee County had Rosenwald buildings. In Boley, the Boley High School was constructed using a 1926 Rosenwald grant. The Booker-Tee Separate Consolidated District #32 School was constructed in 1927 using Rosenwald monies. In the all-black community of Langston, Logan County, on the campus of the Colored Agricultural & Normal University, Oklahoma's only black institution of higher learning, the Rosenwald Fund aided in the construction of the 1928 Practice School Building, a 1929 shop building and, also in 1929, a teacherage. In Seminole County, the all-black town of Lima's School District #5 constructed the Rosenwald Hall in 1921.

Rosenwald grants were utilized in McIntosh County's two all-black towns of Rentiesville and Vernon. The district in Rentiesville constructed the Rentiesville County Training School in 1925 and Vernon's school district built the Vernon School in 1920 with an addition in 1925. The Foreman School and the teachers' home at Foreman School #2 in Sequoyah County were built in 1921 in, or at least in the vicinity of, the all-black town of Foreman. In Wagoner County's all-black towns, the

Rosenwald Fund contributed to the erection of the 1924 Gibson Station School #67 in Gibson Station; the 1929 Red Bird District #35 School and Shop in Red Bird; and, the 1920 Tallahassee (sic) School in Tullahassee.³⁷

On the national level, the Rosenwald Fund aided in the construction of 5,357 schoolhouses, shops and teachers' homes costing a total of \$28.4 million. Operating in fifteen states including Oklahoma, 883 counties received aid from the Rosenwald Fund in the amount of \$4.3 million. An additional \$4.7 million was raised from the local African-American communities and the local white communities donated \$1.3 million. The remaining \$18.1 million was provided by the local governments.³⁸

Although the Julius Rosenwald Fund contributed slightly less than \$150,000 of the total \$1.1 million construction cost of the new buildings in Oklahoma, the existence of the fund was critical to the building of the black schools. By providing a cash inducement, the Rosenwald Fund focused the state and local communities attention on the insufficiencies in black education and provided a viable means of improving the situation. Beyond the monetary assistance, the fund also provided the necessary infrastructure to facilitate a school building program for black schoolchildren in the racially biased south. Although the majority of matching monies in Oklahoma and nationally were derived from the counties and school districts, the nearly \$29,000 contributed by the African-American community and \$5,000 plus provided by the local white population in Oklahoma was significant because it represented the interests of the community in the education of their youth.

PROPERTY TYPE ANALYSIS

All of the properties associated with the Julius Rosenwald Fund in Oklahoma are education-related. Total, there were 198 buildings constructed through the Julius Rosenwald Fund in Oklahoma; 176 schoolhouses, 16 teachers' houses and 6 shops. Following is a analysis of the Rosenwald buildings in Oklahoma based on the information available from the Julius Rosenwald Archives Fund at Fisk University in Nashville, Tennessee. The factors examined include type and building material. The type of school is classified by its original construction and does not reflect latter additions funded by the Rosenwald Fund as these additions were not considered separate projects and several schools were added on to more than once, thereby, complicating an analysis of them. Information on the additions, including year and number of rooms, can be found in the historic context and Appendix D.

Typical of the time period, 74 of the Rosenwald schools were of the one-teacher type. An additional 55 were a two-teacher type and 17 were for three teachers. Only 11 of the 176 schoolhouses were of the four-teacher type. The fund aided in the construction of 7 five-teacher schools and 7 six-teacher buildings. There were 3 eight-teacher type schools constructed, one each in Comanche County, Okfuskee County and Seminole County. The largest school built with the Rosenwald aid was the Washington Separate Consolidated #3 in Oklahoma County. This school, built in the last year of the program, could accommodate twenty-two teachers. There was no information available for two of the schools.

The Rosenwald Fund partially funded the construction of 16 teacherages in Oklahoma. Twelve of the 16 teacherages did not have any information regarding the

number of rooms. Of the remaining 4, there was 1 four-room, 1 five-room, 1 six-room and 1 nine-room. The four-room teacherage was located in Jackson County in the Lincoln Separate District #18. The Foreman School #2 in Sequoyah County had the five-room teachers' home. The six-room teachers' house was located at the Slater-Rosenwald School in McCurtain County. And the nine-room teacherage was located at Colored Agricultural & Normal University (C. A. & N. University), now Langston University, in Langston, Logan County.

Six shops were built under the auspices of the Rosenwald Fund. This included 2 one-room shops, 2 two-room shops, 1 three-room and 1 eight-room. In Pottawatomie County, one of the one-room shops was located at the Brookville District #6 Banneker School. Red Bird School in Wagoner County had the other one-room shop. Douglass School in Comanche County and Dunbar Consolidated School #5 in Kingfisher County had the 2 two-rooms shops. Wewoka's Douglas School in Seminole County boasted the three-room shop. The eight-room shop was located at C. A. & N. University in Logan County.

Based on the photographs in the Rosenwald Fund archives, the majority of the 176 schoolhouses, at least 136, were constructed of weatherboard. Sixteen of the school buildings had no photographs to show the building material. Twenty-three of the buildings with photographs were built of brick and just two of stone. Of the brick schoolhouses, there were no one-teacher types; 3 two-teacher types; 5 three-teacher types; 5 four-teacher types; 3 five-teacher types; 6 six-teacher types; and, 1 eight-teacher type. The two schools which appear to have been built of stone are the four-

teacher type Tatums School District #5 in Carter County and the three-teacher type Parker's Chapel School in Seminole County.

One school which did not have a photograph as part of the Rosenwald Archives, the Douglass School in Lawton, Comanche County, was documented in 1992 as part of the Reconnaissance Level Survey of certain portions of the city of Lawton. The documentation indicates the building was built in 1931, the Rosenwald Papers indicate a date of 1930-1931. The building, constructed of brick, was originally an eight-teacher type. The school has been altered by the replacement of the windows with aluminum windows, the addition of a brick entry porch and several other additions. As such, the school does not maintain its integrity sufficiently to be eligible for the National Register of Historic Places.

Seven of the teacher's homes were built of weatherboard or a vertical wood batten with the remaining nine unknown. Only two of the six shops had photographs showing the building material. Of these, one was stone, the shop at C. A. & N. University, and one was weatherboard, the Douglas Shop at Wewoka in Seminole County.

Most of the Rosenwald buildings were one-story, similar to the plans published by the Rosenwald Fund. However, at least five Oklahoma schools had two-stories. These included the Arcadia Consolidated School #5 in Oklahoma County; Kay County's Ponca Separate District #71; the Crescent (Douglass) Separate U.G. School in Logan County; Boley High School in Okfuskee County; and, Pawhuska Separate School in Osage County.

Because the majority of buildings were one-teacher and two-teacher type schools constructed of weatherboard, it is unlikely that a high number will be extant. Many of the schools would have been abandoned beginning in the mid to late-1940s with overall rural school consolidation and desegregation beginning in the mid-1950s. The schools located in more urban areas and constructed of brick, such as the Douglass School in Lawton, will possibly have undergone numerous additions and alterations, if still extant.

One of the brick, four-teacher type buildings, the Lima School District #5 was placed on the National Register of Historic Places on September 28, 1984 as part of the thematic nomination "Educational Resources of All-Black Towns in Oklahoma." The Oklahoma SHPO has begun research to determine the location of other Rosenwald buildings and to identify the remaining extant buildings with the eventual goal of nominating those that are eligible to the National Register of Historic Places.

BIBLIOGRAPHY

Articles

Hanchett, Thomas W. "The Rosenwald Schools and Black Education in North Carolina." The North Carolina Historical Review. 65 (October 1988): 387-427.

Excellent article concerning the Rosenwald Fund. Contains good information on the implementation of program in the fifteen southern states, but concentrates on North Carolina.

Carney, George O. "Historic Resources of Oklahoma's All-Black Towns: A Preservation Profile." The Chronicles of Oklahoma. LXIX:2 (Summer 1991): 116-133.

Provides a summary of survey of resources in Oklahoma's All-black towns. Also contains good information and a map showing the communities.

Books

Anderson, James D. The Education of Blacks in the South, 1860-1935. Chapel Hill: The University of North Carolina Press, 1988.

Extensive discourse on black education in the south, including discussion on the Rosenwald Fund.

Bond, Horace Mann, Ph.D. Negro Education in Alabama: A Study in Cotton and Steel. Washington, D. C.: The Associated Publishers, Inc., 1939.

Discusses black education in Alabama with a chapter on philanthropy and black education, including the Rosenwald Fund. Alabama was the first state to participate in the Rosenwald school building program.

Community School Plans. Nashville: Julius Rosenwald Fund Southern Office, 1931.

Contains plans and descriptions for school buildings published by the Rosenwald Fund for use in the construction of Rosenwald buildings. Plans were also provided to the various State Departments of Education for use in non-black schools.

Embree, Edwin R. and Julia Waxman. Investment in People: The Story of the Rosenwald Fund. New York: Harper & Brothers Publishers, 1949.

Relates the history of the Rosenwald Fund by the former president of the Julius Rosenwald Fund.

Embree, Edwin R. Julius Rosenwald Fund: A Review of Two Decades, 1917-1936. Chicago: Julius Rosenwald Fund, 1936.

Details the history of the first two decades of the Rosenwald Fund, including expenditure of money.

Improvement and Beautification of Rural Schools. Nashville: Julius Rosenwald Fund Southern Office, May 1936.

Report by the Southern Office on the condition of the Rosenwald buildings two years after the school building program ended.

Smith, S. L. Builders of Goodwill: The Story of the State Agents of Negro Education in the South, 1910-1950. Nashville: Tennessee Book Company, 1950.

Discusses the state agents of black education, which were sponsored by grants from the General Education Board. Includes discussion on the Rosenwald building program by Smith, director of the Julius Rosenwald Fund Southern Office.

Weil, Gordon L. Sears, Roebuck, U.S.A.: The Great American Catalog Store and How It Grew. New York: Stein and Day, 1977.

Relates the development of Sears, Roebuck and Company. Includes information on Rosenwald, called "The Man Who Saved Sears."

Werner, M. R. Julius Rosenwald: The Life of a Practical Humanitarian. New York: Harper & Brothers Publishers, 1939.

Discourse on Julius Rosenwald and his charitable causes and contributions, including the Rosenwald Fund.

Government Documents

The Eighteenth Biennial Report of the State Superintendent of Public Instruction of Oklahoma and the Fifteenth Biennial Report of the State Board of Education of Oklahoma. Guthrie: Co-Operative Publishing Company, 1940.

Report of the State Superintendent concerning the educational developments in the state for the years 1939 and 1940. Includes good statistical and other information on the separate schools.

Eleventh Biennial Report of the State Superintendent of Public Instruction Together with the Eighth Report of the State Board of Education. Oklahoma State Board of Education, 1926.

Report of the State Superintendent concerning the educational developments in the state for the years of 1925 and 1926. Contains good statistical and other information on the separate schools, including information on the Rosenwald Fund activities in Oklahoma.

The Fifteenth Biennial Report of the State Superintendent of Public Instruction and the Twelfth Biennial Report of the State Board of Education. Oklahoma State Board of Education, 1934.

Report of the State Superintendent concerning the educational developments in the state for the years of 1933 and 1934. Contains good statistical and other information on the separate schools, including information on the Rosenwald Fund activities in the state.

The Fourteenth Biennial Report of the State Superintendent of Public Instruction and the the (sic) Eleventh Biennial Report of the State Board of Education. Oklahoma State Board of Education, 1932.

Report of the State Superintendent concerning the educational developments in the state for the years of 1931 and 1932. Contains good statistical and other information on the separate schools, including information on the Rosenwald Fund activities in the state.

Ninth Biennial Report of the State Superintendent of Public Instruction Together with the Sixth Report of the State Board of the State Board of Education, Oklahoma State Board of Education, 1922.

Report of the State Superintendent concerning the educational developments in the state for the years of 1921 and 1922. Contains good statistical and other information on the separate schools, including information on the Rosenwald Fund activities in Oklahoma.

Seventh Biennial Report of the State Superintendent of Public Instruction Together with the Fourth Report of the State Board of Education. Allied Printing, 1918.

Report of the State Superintendent concerning the educational developments in the state for the years of 1917 and 1918. Contains good statistical and other information on Oklahoma's separate schools.

Sixteenth Census of the United States: 1940. Volume II. Washington, D.C.:
United States Government Printing Office, 1943.

Census figures for Oklahoma in 1940. Tables of Composition of the Population by Counties included the statistics from the 1930 Census, including the number and percentage of African-Americans in Oklahoma's seventy-seven counties.

Tenth Biennial Report of the State Superintendent of Public Instruction Together with the Seventh Report of the State Board of Education. Oklahoma State Board of Education, 1924.

Report of the State Superintendent regarding the educational developments in the state for the years of 1923 and 1924. Contains good statistical and other information on the separate schools, including information on the Rosenwald Fund activities in the state.

The Thirteenth Biennial Report of the State Superintendent of Public Instruction and the the (sic) Tenth Biennial Report of the State Board of Education. Oklahoma State Board of Education, 1930.

Report of the State Superintendent concerning educational developments in the state for the years of 1929 and 1930. Contains good statistical and other information on Oklahoma's separate schools, including information on the Rosenwald Fund activities in the state.

Twelfth Biennial Report of the State Superintendent of Public Instruction Together with the Ninth Report of the State Board of Education. Oklahoma State Board of Education, 1928.

Report of the State Superintendent regarding the educational developments in the state for the years of 1927 and 1928. Contains good statistical and other information on the separate schools, including information on the Rosenwald Fund activities in Oklahoma.
