ABSTRACT

This report for PHASE II of the "Architectural/Historic Intensive Level survey of Certain Parts of Downtown Okmulgee" project contains the objectives of the project, descriptions of the survey area and the research design and methodology employed during the project, lists of the types of properties identified and properties that potentially are eligible for the National Register of Historic Places, a description of the downtown historic district, a summary and recommendations.

An intensive survey of thirty-two (32) blocks surrounding the core of Okmulgee's downtown commercial area was conducted by Meacham & Associates, as directed by the Historic Preservation Commission of the City of Okmulgee. Each structure included within the boundaries of these thirty-two (32) blocks was individually surveyed and designated as contributing or noncontributing to the district, based on established criteria. One-hundred and five (105) were considered contributing, thirty-three (33) were considered noncontributing and eight (8) more buildings were found, but not surveyed, which fell into the recommended boundaries of the district. The thirty-two blocks surveyed in Phase II and the nine blocks surveyed in Phase II were then evaluated together to determine whether or not the entire area was eligible for listing in the National Register of Historic Places as a district.

Minimum-level documentation was completed on 142 properties, and specific data on each survey was recorded onto a survey form. The types of properties documented include 111 commercial structures, 9 single-dwelling units, 4 multiple-dwelling units, 1 religious structure, and 2 government buildings. Fifteen (15) miscellaneous property types were also surveyed.

The thirty-two block survey area of Phase II, combined with the nine blocks of Phase I, appears to be eligible for inclusion in the National Register as a district. The boundary of the district was selected on the information collected during the survey and includes all or parts of forty of the forty-one blocks surveyed during Phase I and Phase II. It is recommended that a nomination for the National Register of Historic Places be completed and submitted to the Oklahoma Historical Society.

A map of the entire (Phase I and Phase II) survey area, included with this report, identifies all properties surveyed, their dates of construction, and the status (contributing or noncontributing) of each property.
INTRODUCTION

In accordance with the Oklahoma State historic Preservation Office Comprehensive Historic Preservation Planning Process, an "Architectural/Historic Intensive Level Survey of Certain Parts of Downtown Okmulgee" was conducted by Meacham & Associates. The primary goal of the project was to survey each structure located on the designated thirty-two blocks in order to provide information useful for making management decisions about properties and districts potentially eligible for the National Register of Historic Places.

The period of significance was expanded from Phase I to include the years from 1878 to 1939. The period from 1930, which was suggested in the Phase I, has been expanded to cover the development of the larger commercial area which was surveyed in Phase II.

The survey was conducted in accordance with the Secretary of the Interior's "Standards and Guidelines for Planning, Identification, Evaluation, and Registration." Furthermore, the survey complied with the Oklahoma Historic Preservation Office Comprehensive Preservation Planning Process and the Guidelines for Subgrantees.

PROJECT OBJECTIVES

The project focused on the following objectives:

1. Through an intensive-level survey, the identification of those properties in a 32-block study area in downtown Okmulgee that warranted further study to determine eligibility for listing in the National Register of Historic Places, using the criteria of age (over 40 years old) and integrity.

2. The identification of characterization of those portions of the survey area that warranted no further study and would be excluded from further consideration for nomination to the National Register of Historic Places, on the basis of insufficient age or integrity.

3. The photographic documentation of each property included within the boundaries of the survey area.

4. The identification and annotation of all reference material necessary for completing National Register nominations of properties.
and districts in the study area.

5. The preparation of files for each property identified by the field surveyors.

6. The preparation of a photograph index to accompany negatives.

8. The preparation of a map to identify each property surveyed, the approximate date of construction of each building, and the significance (contributing or noncontributing) each would make to the potential district.

DESCRIPTION OF THE SURVEY AREA

The area surveyed for the "Architectural/Historic Intensive Survey of Certain Parts of Downtown Okmulgee" included thirty-two downtown blocks. These blocks surrounded the nine blocks which were surveyed in Phase I and determined to be only a part of a potential historic district. The survey encompassed the following area:

From the initial point of the N.E. corner of Eighth and Alabama north on Alabama Avenue to Fifth Street. East on Fifth Street to Seminole Avenue, then north on Seminole Avenue to Fourth Street. East on Fourth Street to Central Avenue, then south on Central Avenue to Fifth Street. East on Fifth Street to Muskogee Avenue, then north on Muskogee Avenue to Fourth Street. East on Fourth Street to Choctaw Avenue, then south on Choctaw Avenue to Sixth Street. West on Sixth Street to Railroad Right of Way (ROW) then south on the ROW to the center of Block 96. West through the center of Blocks 96, 95, 94, and 93 to Muskogee Avenue. South on Muskogee Avenue to the center of Block 120, then east down the alley or property line to Porter Avenue. North on Porter Avenue to Eighth Street, then west on Eighth Street to initial point. Blocks previously surveyed in Phase I were not surveyed in Phase II.

Alterations to the area surveyed included:

The west halves of blocks 84, 87, and 111 containing noncommercial properties were not individually surveyed as they were determined to not fit the criteria for inclusion in the downtown historic district.
Parts of Block 50, 49, and 48 were individually surveyed. Although not included in the contract, this area north of the downtown, including the Post Office, was determined to contain properties which met the criteria for inclusion in the downtown historic district.

The north half of Block 96, which was included in the contract, was not surveyed. It contained a minimal amount of properties and none met the criteria for inclusion in the downtown historic district.

Commercial establishments dominate the survey area. Surrounding the nine blocks surveyed in Phase I, the area surveyed in Phase II is a continuation of commercial properties built prior to 1939. The majority of the properties were built before 1930. The Okmulgee Library (NR 1983) and the Okmulgee County Courthouse (NR 1984) were surveyed. Each are currently listed in the National Register.

RESEARCH DESIGN AND METHODOLOGY

During the project, Meacham & Associates took the following steps:

1. Archival research was conducted at the University of Oklahoma, Western History collections; the Okmulgee City Library; the City of Okmulgee Planning Department; and the Okmulgee Daily Times. Items studies in the research included:

   B. Plat maps,
   C. Information pertaining to the history of Okmulgee, and
   D. Historic photographs of downtown Okmulgee.

The methodology used for obtaining information concerning the survey included a combination of archival research and field surveys. The following procedures were followed:

1. Sanborn Fire Insurance Company maps of Okmulgee were obtained.
2. Existing survey material at the local and state level were reviewed, including:

   A. National Register nominations,
   B. Vertical files at the Oklahoma Historical Society, and
   C. Vertical files at the Okmulgee Public Library.
3. Research was conducted to locate material on the history of Okmulgee.
4. An intensive-level survey of the area was conducted.
5. Minimum-level documentation was completed on properties within the survey boundaries. A total of 140 properties were surveyed.
RESULTS

SUMMARY

All properties located within the boundaries of the designated survey area for Phase II have been surveyed and photographed, and a determination has been made regarding the contributing or noncontributing status of each to the potential downtown historic district. Seventy-seven percent (77%) of the properties were found to be contributing to the district and twenty-three percent (23%) were found to be noncontributing. This compares to seventy-eight percent (78%) of the properties surveyed during Phase I as contributing and twenty-two (22%) noncontributing.

The physical characteristics, style, architectural integrity, date of construction, and relationship to the historic context of the district were assessed to determine whether each building was individually eligible for listing in the National Register and whether the relationship of the buildings collectively warranted the designation of the area as a historic district, potentially eligible for listing in the National Register.

It was determined that all nine blocks surveyed during Phase I and all or parts of thirty-one of the thirty-two blocks surveyed during Phase II should be included in a Downtown Historic District in the City of Okmulgee and should be nominated to the National Register. A total of two hundred and three properties are included in the recommended boundary of the "Historic Downtown Okmulgee" historic district. (138 from Phase II, 59 from Phase I, and 8 remaining to be surveyed.)

TYPES OF PROPERTIES IDENTIFIED

Property types sought in the survey area included:

1. Commercial Buildings
   A. Hotels
   B. Banks
   C. Theaters
   D. Groceries
   E. Hardware stores
   F. Office buildings
   G. Warehouses
H. Retail establishments
2. Residences
3. Churches
4. Schools
5. Government Buildings
6. Transportation Facilities
7. Industrial Buildings

The following types of properties were identified in the "Architectural/Historic Intensive Survey of Certain Parts of Downtown Okmulgee":

1. Commercial Structures

One hundred and eleven (111) commercial properties are located within the survey area of Phase II. Located in the town square is the Creek National Capitol, built in 1878. The eight blocks surrounding the Capitol were surveyed during Phase I and were built before 1920, with only a few constructed between 1920 and 1939. The commercial properties located with the survey area of Phase II were built primarily between 1920 and 1939. The older buildings closer to the Creek National Capitol were built shortly after Statehood, with the later ones constructed through the years until the late 1930's. The exception to this is a collection of approximately 10 buildings located along the St. Louis and San Francisco Railroad, including the Depot. These buildings were built before 1920.

2. Domestic Dwellings

A. Single Dwellings
Nine (9) single dwellings stand in the survey area.

B. Multiple Dwellings
Four (4) multiple dwellings stand in the survey area.

C. Religious Structures
One church is located in the survey area.

D. Government Structures
The Okmulgee Post Office and Federal Courthouse is located within the boundaries of the survey area. It was constructed in the early 1930's. The Okmulgee County Courthouse is also located in the survey area.
DESCRIPTION OF THE OKMULGEE DOWNTOWN HISTORIC DISTRICT -
Phase I and Phase II Survey areas

The Central Business District is centrally located in the City of Okmulgee. The main arterial is Sixth Street, which runs east-west. Commercial buildings spread from the core, where the Creek National Capitol National Historic Landmark is located.

Of the 203 structures in the Phase I and Phase II survey areas which are located within the recommended boundary of the historic district, 151 are contributing elements in the potential historic district. many of the 46 noncontributing buildings could contribute to the district if intrusive sheathing were removed. The area is characterized by a rich texture. Almost all the contributing buildings are constructed of brick. The texture of the district is further enhanced by a number of sandstone buildings, many with brick facades. In addition, three buildings faced or embellished with elaborate terra cotta punctuate the district.

Stylistically, most of the historic buildings in the district may best be characterized as simply "Early Commercial." These relatively plain, vernacular structures feature rectangular window openings and are often embellished with corbel tables and patterned brickwork. A particularly noteworthy example of this idiom is the Severs Block, located at 101 E. 6th Street. Together, these Early Commercial buildings create a visual sense of coherence. Contrast, however, is created by a variety of styles represented in the district. A handful of vernacular Romanesque Revival buildings, distinguished by round-arched window openings, provide visual diversity, particularly along Morton Avenue. Good examples include the Browns Shoes Building (104 S. Morton), the Parkinson and company building (100 S. Morton, the old City Hall (115 N. Morton), and the Salvation Army Citadel (213 S. Grand).

Examples of several other revival styles, including the Neoclassical Revival, the Spanish Baroque Revival, the Renaissance Revival, and late Gothic Revival enhance the character of the district, as do representations of the Italianate, Beaux Arts, Prairie, Bungalow, Folk Victorian, Art Deco and Moderne styles. Outstanding examples include the Italianate-style Creek National Capitol (6th and Grand), the Renaissance Revival style McCulloch Building (108-114 N. Grand), the Spanish Baroque Revival-style Cock/Orpheum Theatre (210 W. 7th), the Neoclassical Revival-style Bank of Commerce (110 E. 6th), the late Gothic Revival-style Christian Church (211 W. 8th), and the Beaux Arts-style Commerce Building (117-121 S. Grand).
Excellent examples of early twentieth-century commercial buildings surveyed during Phase II include the Italianate-styled Okmulgee Courthouse and Okmulgee Public Library, 101-107 E. 5th and 202-204 E. 6th. The Art Deco style of architecture is also represented among the Phase II properties and include 108 N. Okmulgee and 324 E. 6th.

RECOMMENDATIONS

Recommendations for the Okmulgee Downtown Historic District are as follows:

1. Prepare and submit a nomination to the National Register of Historic Places for an Okmulgee Downtown Historic District. Nominations must be submitted to the Oklahoma State Historic Preservation Office approximately 45-50 days before the review day. Nominations are reviewed quarterly, in January, April, July, and October, on the third Thursday of the month. Note: The properties on Block 60 and Block 61 must be individually surveyed and owners noted before submitting the nomination.

2. Prepare Design Guidelines for the Okmulgee Downtown Historic District. These guidelines should offer property owners information on the history of the district, the history of the significant structures in the district, information pertaining to the National Register of Historic Places, tax incentives for buildings in the National Register, rehabilitation guidelines tailored to the needs of the district, and a list of rehabilitation resources.

3. Continue to survey the City of Okmulgee for historic resources. Research indicates that there are residential and industrial properties in Okmulgee that may be eligible for listing in the National Register. Recognition of historic resources is an excellent way to encourage rehabilitation and preservation of historic properties.

4. Encourage the City of Okmulgee to designate the forty blocks that have been surveyed as a local historic district, subject to protection under Okmulgee's Historic Preservation Ordinance.

5. Develop an educational program to educate all levels of the community about the city's historic resources.
SUMMARY

The Phase II "Architectural/Historic Intensive Level Survey of Certain Parts of Downtown Okmulgee" covers thirty-two (32) blocks surrounding the core of the Central Business District. These thirty-two blocks were chosen after Phase I was completed and it was determined that the first nine blocks surveyed did not contain all the properties associated with the Okmulgee's commercial historic district.

The properties surveyed in both Phase I and Phase II are primarily two-story, brick commercial buildings. These buildings surround the Creek National Capitol, a National Historic Landmark. The majority express simple designs, but these are juxtaposed with a rich variety of turn-of-the-century and early-twentieth-century architectural styles.

The buildings nearest the core were built to accommodate the early stages of commercial development of the city, while many of the out lying properties were built as a result of the oil and gas industry.

It is recommended a nomination to the National Register of Historic Places be completed for the Okmulgee Historic Downtown District. Furthermore, the City of Okmulgee should consider designating the area within the boundaries of this district as a protected area in accordance with the city's historic preservation ordinance.

It is also recommended that Design Guidelines for the Okmulgee Downtown Historic District be initiated as soon as possible. These guidelines would enable property owners in the district to better understand the goals of the Okmulgee Historic Commission and to property maintain the character of their historic properties.

Further surveys of the city should be conducted and should include the residential and industrial areas. It is recommended that, upon the completion of the nomination of the downtown Historic district, a survey of these other districts and individual properties be conducted.

In conclusion, the City of Okmulgee has a great number of historic resources that should be recognized, preserved, and rehabilitated or restored. Special consideration should be given when undertaking changes that involve historic buildings and neighborhoods. It is important to the future planning efforts of the city to protect these resources in order to maintain a tangible link between the past and the future.
